Subject Index, Volume 21, 1984

A

Aaptamine Structure Determination **502**
Abresoline Total Synthesis **710**
Absolute Configuration 2-Alkylchroman-4-spirohydantoins **583**
Acetophenone Chlorosulfonation to Benzothiophene-1,1-dioxide **597**
4-Acetyl-2-methylthio-$\triangle^2$-1,2,3-thiadiazoles Oxidation with MCPBA **626**
Aclacinomycin 352
Acodazole Synthesis **436**
Acromeric Acid A Structure Determination **510**
Acromeric Acid B Structure Determination **510**
(+)-Actinobolin Stereoselective Synthesis **151**
(−)-Actinobolin Stereoselective Synthesis **151**
4-Acyl-3-arylsydnones Oxidation and Reduction **629**
Acylation Furocoumarin **642**
***N*-Acylbenzylamines** Photolysis **397**
Acyl Carrier Pyrazinols and Pyrazinethiols **671**
Acyl Dianion Equivalent 2-Lithio-2-trimethylsilyl-1,3-oxathiane **361**
1-Acylindoles Photoisomerization to Indolenines **409**
3-*N*-Acyl Uridines Synthesis and Property **541**
Addition Azoles with DMAD **735**
Alamaridine Structural Determiantion **557**
Aldol Condensation 2-Alkyloxazoles **534**
2-Alkylpyridines **534**
2-Alkylthiazoles **534**
N^6-Alkoxy-1,3-dialkyladeninium Salts Synthesis **745**
Alkoxylation Pyridinecarboxamides **532**
Alkylation 3,5-Dioxoisoxazoles **591**
3,5-Dioxopyrazoles **591**
N-Heterocycles *via* Their α-Amino Carbanion **360**
Pyridinecarboxamides **532**
Triacetic Acid Lactones **766**
2-Alkylchroman-4-spirohydantoins Synthesis and Absolute Configuration **583**
2-Alkyloxazoles Aldol Condensation **534**
2-Alkylpyridines Aldol Condensation **534**
2-Alkylthiazoles Aldol Condensation **534**
Alkynylation Epoxyalcohols **593**
3-Allylthio-1,2,4-triazin-5(2*H*)-ones Claisen Rearrangemnt **515**
Althiomycin Synthesis **415**

α-Amino Carbanion Alkylation of *N*-Heterocycles 360
7β-Aminocephalosporins Conversion to 7α-Methoxycephalosporins 425
1-Aminohexatriene Intramolecular Aminopalladation 486
5-Aminoisoxazoles Reaction 618
4-Amino-7-nitrobenzo-2-oxa-1,3-diazoles Synthesis 782
Aminopalladation 1-Aminohexatriene 486
4-Aminopyridine *N*-Oxide Pseudo-Gomberg Reaction 537
2-Aminopyrido[1,2-*a*: 3',2',*d*]imidazole Reaction with DNA 437, 438
Synthesis 438
3-Amino-1,2,4-triazines Reaction with Diketene 744
5-Amino-1,2,4-triazoles Reaction with Cyclic β-Keto Esters 742
Synthesis and Structure 580
5-Amino-1-vinyl-4,5-dihydor-1*H*-1,2,3-triazoles Conversion to Pyrroles 627
Angular Hydroxylation Benzeneselenic Anhydride 765
Anilinoimidazo[4,5-*f*]quinolines Synthesis 436
Aninoic Reaction $\triangle^2$-Pyrazolines 716
Annelation Four-carbon Annelation 640
Isoxazole with Diironnonacarbonyl 615
Pyran 638
Three-carbon Annelation 640
Annulenes Coupling with Diazonium Salts 393
Anodic Oxidation Synthesis of Amido-lactones 689
Anthracyclines Synthesis and Conformation 21
Anthracyclinone Synthetic Approach 724
Antibacterial Activity 2-Fluoroalkylthiopenems 420
2-Phenyl-4*H*-benzo[*b*]thiopyran-4-ones 778
Thiazolo[5,4-*b*]pyridines 780
Thioflavones 778
Antitumor Antibiotics 352
2-Arylideneaminopyridines Reaction with Haloketenes 528
***N*-Aryl-2(1*H*)-pyrimidinones** Reformatsky Reaction 538
4-Aryltetrahydroisoquinolines Synthesis 696
Asparenomycin C Synthesis by Chemicoenzymatic Approach 427
Aspidospermidine Synthetic Approach 726
Asymmetric Charge Distribution Metallochlorins 382
Asymmetric Cyclization Synthesis of (+)- and (−)-Actinobolin 151
Asymmetric Epoxidation Chalcones in Polyamino Acids 548
Asymmetric Photocyclization Enamide Cyclization 480
Asymmetric Synthesis β-Lactams 418, 419
Phosphonic Acids From *L*-Prolinate 608
Thienamycin 419

Asymmetric Transformation Alkanoic Acids **616**
Autocatalyzed Addition Ketenes to Thiazoles **453**
Aza[15]annulenes Synthesis by Novel Cyclization **759**
7-Azabenzonorbornadienes Photochemical Reaction **692**
Aza-12-crown-4 Synthesis **762**
Aza Crown Ethers Synthesis **235**
1-Aza-dibenzo[*c,f*]bicyclo[3.3.1]nona-3,6-dienes Synthesis and Ring Transformation **482**
4-Azahomoadamant-3(4)-ene Synthesis and Reaction **576**
4-Aza-4-homobrend-3(4)-enes Synthesis and Reaction **576**
3-Azaindolizines Synthesis **651**
2-Azathiabenzene 1-Oxide Synthesis and Properties **468**
3-Azatricyclo[4.1.0.0]heptanes Formation from Pyridines **681**
1-Azatriptycene Photochemistry **582**
Aza-Wittig Reaction Generation of Bridgehead Imines **576**
Azecines Formation by Ring Destruction **733**
Azetidines From Azetidin-2-ones by Reduction **595**
Azetidin-2-ones Reduction to Azetidines **595**
Azidomethoxyquinolines Ring Expansion to Methoxypyridoazepines **485**
Azidotriazolines Conversion to Tetrazoles **372**
Aziridine Synthesis of γ-Lycorane and Erythrinan **770**
Aziridines Synthesis **490**
Aziridinobenzazocin-5-one Synthesis **594**
Azoles Addition with DMAD **735**
Azonia Compounds Reaction **712**
Azonine Formation by Ring Destruction **733**
Azulenoquinolines Bond Alternation and Multagenicity **439**

B

Barbiturates Synthesis **579**
Barbituric Acid Oxidation to 5-Hydroxybarbituric Acids **653**
5-Benzalimino-1,2,4-triazoles Reaction **514**
2-Benzazepin-3-ones Synthesis from *N*-Phenylacetyliminium Ion **700**
Benzeneselenic Anhydride Angular Hydroxylation **765**
1,4-Benzodiazepines Synthesis **511**
Synthesis *via* Palladium Catalyzed Carbonylation **411**
2,4-Benzodiazepines Synthesis and Reaction **688**
1,4-Benzodithiine 1,1,4,4-Tetraoxide Diels-Alder Reaction **752**
Bonzodithiol-2-yl Hydroxyl Protecting Group in Nucleosides **789**
Benzofuran Synthesis **737**
Benzo[*e*]indolizidines Synthesis **399**
Benzo[*c*]phenanthridines From Protopine *N*-Oxide by Conversion **771**

1*H*-2-Benzopyran-1-one Carboxylic Acid Curtius Rearrangement **569**
Benzopyrano[3,4-*c*]pyrazol-4(3*H*)-ones Isomerization of 4-Diazomethylcoumarins **530**
Benzopyrano-[4,3-*b*]-pyridine Ring Systems Synthesis **504**
Benzopyrones Photochemical Cycloaddition with Acetylene **685**
Benzo[*c*]quinolizidines Synthesis **399**
Benzo[*a*]quinolizinium Salts Reaction **712**
Benzo-Separated Xanthines Synthesis and Biological Activity **501**
Benzothiazecines Synthesis **684**
1,3-Benzothiazine-β-lactams Isoquinoline Synthesis **461**
4*H*-1,4-Benzothiazines Synthesis **793**
Benzothiazocines Synthesis **684**
Benzothiazolines Conversion into *N*-(2-Acylthio)phenylenamides **794**
Synthesis from 2-Halonitrobenzenes **455**
Benzothiazonines Synthesis **684**
Benzoxazines One-Pot Synthesis **709**
1,3-Benzoxazines Synthesis **679**
Reaction with Aroyl Cyanides **680**
3-Benzoyl-3,4-dihydro-4-quinazolinecarbonitrile Synthesis and Reaction **512**
1-Benzyl-1,4-dihydronicotinamide NADPH Model **391**
Berberinium Hydroxide Synthesis **725**
Bicyclomycin Total Synthesis **61**
Bicyclo[5,3,1]undecan-4-ones Synthesis **371**
Bioactivity 1,2,4-Tetrazolo[4,3-*a*]perimidines **779**
1,2,4-Triazolo[4,3-*a*]perimidines **779**
Biological Activity Benzo-separated Xanthines **501**
5'-Capped 2',5'-Oligoadenylates **444**
Carbethoxygermanium Sesquioxide **752**
Monobactams **191**
Naphthofurans **631**
Tubercidin Analog **445**
Biomimetic Double Cyclization Synthesis of Tryptoquivalines **406**
Biosynthesis β-Substituted Alanines **705**
2,2-Bipyridines Metal Ion Uptake and Release **377**
3,6-Bis(2-allylphenoxy)pyridazines Double Cyclization **658**
Bis-azetidine-2,4-diones Synthesis **447**
Bis(Crown Ethers) Structure and Cation Selectivity **761**
Bleomycin **352**
Bleomycin-Fe(II)-O_2 Complex DNA-Cleavage **412**
Bond Alternation Azulenoquinolines **439**
Diazulenopyridines **439**
β-Bourbonene Synthetic Approach **374**

Brevinic Acid Structure Determination **470**
Buten-2-olide Photoinduced Asymmetric (2+2) Cycloaddition **374**
γ-Butyrolactone Synthesis **604**

C

Calimycin Synthetic Approach **767**
Canadensolide Synthesis **602**
Cannabicitrin NMR and X-Ray Studies **758**
5'-Capped 2',5'-Oligoadenylates Synthesis and Biological Activity **444**
3-*H*-1-Carbacephems Reaction **422**
Carbapenams Synthesis **413**
Carbethoxygermanium Sesqioxide Synthesis and Biological Activity **752**
Carbohydrates Synthesis **352**
β-Carboline-3-carboxamides Synthesis and Properties **527**
5-Carboxypyrimidinium Betains Formation from 4-Pyrimidinones **670**
Carpetimycin A Analog Synthesis from Penicillins **432**
Catalytic Transfer Hydrogenation Indoles **722**
Cation Induced π-Cyclization **211**
Cation Selectivity Bis(Crown Ethers) **761**
CD Measurement Tetrahydro-1-α-santonins **588**
Cephalosporin Conversion From Penicillin **424**
Cephalosporin C Methoxylation **414**
Cephem Synthesis *via* Carbene Reaction **423**
Chaenorhine Synthesis **279**
Chelate Reagent 2,3,5,6-Tetra(α-pyridyl)pyrazine **662**
Chemiluminescence *N*-Methyl-9-(dicarboalkoxymethyl)acridanes **584**
Chemotherapeutic Activity 5-Cyano-6-aryluracils **781**
5-Cyano-2-thiouracils **781**
Cherylline Synthesis **696**
Chiral Activity *N,N',N'',N'''*-Tetramethyl-2,11,20,29-tetraaza [3.3.3.3] paracyclophane **760**
Chiral Induction Use of 4(R)-MCTT **454**
Chlorinolysis β-Lactams **429**
2-Chloroformyl-4*H*-3,1-benzoxazino-4-one Synthesis and Reaction **706**
2-Chloro-2-oxo-4,5-dimethyl-1,3,2,λ^5-dioxaphospholene Synthesis **265**
Chlorosulfonation Acetophenone **597**
2-Chlorothiophenes Friedel-Crafts Reaction **596**
20β-H Cholanic Acid Synthesis from *D*-Mannitoal **370**
Chroman Synthesis **737**
Chromenes Synthesis and Property **564**
Chrysomycin A Rearrangement **797**
Cinenic Acid Synthetic Approach **603**

Cinnamoyl-2-pyrones Kostanecki Reaction **633**
Circular Dichroism Interaction of Vincristine to Homopolyribonucleotides **443**
Claisen Rearrangement 3-Allylthio-1,2,4-triazin-5(2*H*)-ones **515**
(±)-Clavicipitic Acid Total Synthesis **407**
Colchifoline Synthesis **354**
(±)-Colletallol Synthesis **639**
Computer-Assisted Structure Antitumor Activity Analysis Purines and Purine Nucleosides **442**
Condensation 1,4-Dihydro-3(2*H*)-isoquinolinones with Aldehydes **479**
Enol Silyl Ethers with Oxime Sulfonates **655**
3-Formyl-2(1*H*)pyridones with Thiones **533**
Condyfoline Total Synthesis **409**
Conformation Anthracyclines **21**
4-Demethoxy-6-deoxydaunorubicin **21**
2'-Deoxypurinenucleotides **75**
10-(S)-Methoxydaunorubicin **21**
Conversion Azidotriazoline to Tetrazoles **372**
Penicillin to Cephalosporin **424**
Protopine *N*-oxide to Benzophenanthridine and Secoberbines **771**
Copper(I) Iodide-Prompted Arylation Heterocycle Synthesis **675**
(±)-Corydalisol Formation from Protopine *N*-Oxide **771**
Coupling Reaction Anulenes with Diazonium Salts **393**
Covalent Hydration 7,8-Dihydro[3*H*]pterin **756**
Crisscross Annelation Heterocycle Synthesis **402**
Crowned Morphines Synthesis **554**
Crowned Thebaine Synthesis and Reaction **554**
Crown Ethers Active Transport of Alkali Metal Cations **378**
Photometric Reagents for Alkali Metals **762**
Properties **376**
Synthesis **375**
(+)-α-Curcumene Synthesis from *D*-Mannitol **370**
Curtius Rearrangement 1H-2-Benzopyran-1-one Carboxylic Acids **569**
1(2*H*)-Isoquinoline Carboxylic Acids **569**
3-Cyanoindolizines Synthesis and Cycloaddition **572**
Synthesis and Reaciton **734**
5-Cyano-6-aryluracils Synthesis and Chemotherapeutic Activity **781**
Cyano-oxyselenylaction Synthesis of Tetrahydrofuran **450**
2-Cyanotetrahydrofurans Synthesis **450**
5-Cyano-2-thiouracils Synthesis and Chemotherapeutic Activity **781**
Cyclic Amidines Proton Transfer Reaction **559**
Cyclic Peptides Synthesis and Property **694**
Cyclization 3,6-Bis(2-allylphenoxy)-pyridazines **658**

Cyclic Amine *N*-Imides **651**
Heterocyclic Dialdehyde with Nitromethane **451**
N-Phenylacetyliminium Ions to 2-Benzazepin-3-ones and Isoquinolones **700, 701**
Cycloaddition Adamantanethione **682**
Benzopyrones with Acetylene **685**
α-Chlorosulfides **750**
α,β-Conjugated Carbodimides **665**
α,β-Conjugated Ketenimines **665**
3-Cyanoindolizines **572**
Ketenes to Thiazoles **453**
Quinones with Homophthalic Anhydrides **724**
Synthesis Macrocyclic Polyethers **718**
Thiirene Sulfoxide **497**
1,3,6-Triphenylimidazo[1,2-*c*]thiazole **573**
(2+2)Cycloadditon Buten-2-olide **374**
[3⁺+2]Cycloaddition Synthesis of Furans and Furanones **750**
[3+2]Cycloaddition Synthesis of Isoxazolidines **710**
[4⁺+2]Cycloaddition Synthesis of Thiochromans and Thiochromens **750**
Cycloalkenopyridines Synthesis **644**
8,14-Cycloberbines Synthesis of Benzindenoazepines **772**
Cyclodextrins Host Compounds **390**
Cyclopiazonic Acid Synthetic Approach **773**
***C*-Cyclopyrimidine Nucleoside** Formation from 2'-*C*-Nitromethyluridine **540**
Cytochrome P-450 Model Porphyrin-Iron Complex **784**

D

Darzens Reaction Stereocontroll in Sugar Template **369**
Daunosamine Synthesis from Oxazole **776**
Dealkylation *tert*-Amines with TMS Reagents **646**
Dearomatization *N*-Methylphthalimides **693**
Decaline Total Synthesis **710**
Decomposition Synthesis **765**
α,β-Dehydroalaninates Cycloaddition **458**
Dehydro-*D*-erythro-ascorbic Acid Formation of Triazoles and Isoxazolines **786**
4-Demethoxydeoxorubicin Synthesis **21**
4-Demethoxy-6-deoxydaunorubicin Conformation **21**
Demethylaaptamine Structure Detemination **502**
3-Demethylcolchicine Synthesis **354**
4-Deoxy-4-*C*-ethylphosphinyl-*L*-lyxofuranose Synthesis **505**
4-Deoxy-4-*C*-ethylphosphinyl-*D*-ribofuranoses Synthesis **505**
Deoxyguanosine Mitsunobu Reaction **545**

2'-Deoxypurinenucleotides Conformation and Properties **75**
Desmosterol Synthesis from *D*-Mannitol **370**
Desulfurization Pyridazino[4,5-*e*][1,3,4]thiadiazines **715**
Thiomacrocycles **386**
1,3-Dialkyluracils Ring Transformation into Pyrimidines **289**
Diazacycloheptatetraenes Formation from Tetrazolopyridines **355**
1,2-Diazepino[4,5-*b*]indole Synthesis **777**
1,2-Diazepino[5,6-*b*]indole Synthesis **777**
4-Diazomethylcoumarins Isomerization into Benzopyrano[3,9-*c*]pyrazol-4(3*H*)-ones **530**
Diazotransfer Reaction Conversion of Azidotriazolines to Tetrazoles **372**
Diazulenopyridines Bond Alternation and Multagenicity **439**
Dibenz[*b*,*f*]oxepin-11(10*H*)-one Oxidative Degradation **634**
Dictamine Synthesis **405**
Diels-Alder Reaction *N*-Acyl-α,β-dehydroalaninates **458**
1,4-Benzodithiine 1,1,4,4-Tetraoxide **752**
Oxazoles **617**
o-Quinone Methide *N*-Substituted Imines **399**
Synthesis of Natural Products **309**
1,3-Dienamines 1,5-Dipoles in Synthesis of *N*-Heterocycles **435**
5-(2,2-Difluorovinyl)uracils Synthesis and Reactivity **667**
1,4-Diheteroepines Synthesis from Pyridines **681**
(±)-Dihydrodeoxyotonecine Synthesis **402**
5,11-Dihydrodibenzo[*b*,*e*]thiepines Synthesis and Properties **471**
4,10-Dihydro-3-hydroxy-3-methyl-1*H*,3*H*-pyrano[4,3-*b*][1]benzopyran-10-one Synthesis **686**
1,2-Dihydroisoquinoline Synthesis by 1,3-Dipolar Cycloaddition **566**
1,4-Dihydro-3(2*H*)-isoquinolinones Reaction with Aldehydes **479**
1,4-Dihydro-3(2*H*)-isoquinolones Formation **397**
4,7-Dihydroisoxazolo[5,4-*b*]pyridines Synthesis **618**
Dihydromahubanolide Synthesis **598**
1,4-Dihydronicotinamides Synthesis and Spectroscopy **796**
7,8-Dihydro-3*H*-pterin Covalent Hydration **756**
Dihydropyrimidine Reaction with *p*-Benzoquinone **654**
Dihydro-4-pyrone Synthesis **604**
6,7-Dihydro-5*H*-pyrrolo[1,2-*a*]imidazole Synthesis **373**
13b,14-Dihydrorutaecarpine Synthesis **404**
5,6-Dihydro-4*H*-1,3-thiazines Synthesis **563**
Dinucleotide-like Compounds Synthesis **790**
1,3-Dimethyladenine Synthetic Approach **745**
4,5-Dimethylcarbazole Synthesis *via* Methyl Migration **723**
2,5-Dimethyl-2-isopropyl-2,3-dihydrofuran Synthesis **775**
1,3-Dioxin-4-ones Reaction **368**

3,5-Dioxoisoxazoles Tautomerism and Alkylation **591**
3,5-Dioxopyrazoles Tautomerism and Alkylation **591**
Diphenylcyclopropenones Synthesis of Pyrimidin-4-ones **666**
Diphenyl Phosphorazidate 1,3-Dipolar Cycloaddition **624**
Synthesis of Amines **650**
1,3-Dipolar Cycloaddition α,β-Dihydroalaninates **458**
Formation of Pyrrolidine **607**
Diphenyl Phosphorazidate **624**
Isoquinoline Synthesis **566**
Thiazolo[5,4-*d*]pyrimidine 1-Oxide **517**
Thiazolo[4,5-*g*]quinazoline 1-Oxide **517**
Trifluoroacetonitrile Ylides **611**
1,3-Dipolar Reaction Phenyltrifluoromethylacetylenes **492**
1,5-Dipoles 1,3-Dienamines **435**
1,4-Dithiines Rearrangement **366**
1,3-Dithiolanes Synthesis **613**
1,2-Dithiolylium Salts Synthesis of 1,2-Tetrathiafulvalenes **467**
DNA Base Thymine Hydroperoxide **561**
DNA-Cleavage Blemycin-Fe(II)-O_2 Complex **412**
DNA Reaction with 2-Aminopyrido[1,2-*a*:3',2'-*d*]imidazole **437, 438**
Dolastatin 3 Synthesis **783**
Double Cyclization 3,6-Bis(2-allylphenoxy)pyridazines **658**
***S,N*-Double Rearrangement** 1,3-Oxazin-6-thiones to Thiazines **367**

E

Eburaine Total Synthesis **409**
Eburnamine Total Synthesis **409**
Eburnamonine Synthesis **727**
Synthetic Approach **689**
Edulinine Synthesis **405**
Electrical Properties Polythiophenes, Polypyrroles, and Polyfurans **394**
Electron-deficient Porphyrins Perfluoroalkylporphyrins **384**
Electrooxidation Piperidines to Piperidones **652**
Electrophilic Reaction Furopyridines **738**
Enamide Photocyclization Asymmetric Synthesis **480**
Enantioselective Protonation Asymmetric Photocyclization **480**
Enantioselective Reduction Asymmetric Photocyclization **480**
Enzyme Model Thiol-Bearing Crown Ethers **379**
Epoxidation Chalcones in Polyamino Acids **548**
Epoxyalcohols Alkynylation **593**
10,9-Epoxyethanoselenoxanthenes Synthesis and Reactions **473**

Epoxyketones Formation from Diazoketones **619**
Ergoline Synthetic Approach **481**
Ervatamine-type Compound Synthesis **351**
Erythrina Alkaloids Synthetic Approach **702**
Erythrinan Synthesis *via* Aziridine **770**
S-Etorphine Synthesis **500**
5-Ethyl-2-oxo-4-piperidineacetic Acids Isomerization **647**
Evodiamine Synthesis **404**

F

Fagazonine Total Synthesis **711**
Flash Vacuum Pyrolysis Tetrazoloyridines **355**
Flavin Catalyst 3-Methyllumiflavin **391**
Fluorescence Interaction of Vincristine to Homopolyribonucleotides **443**
Fluorescent Cyclic Polyether Dye Synthesis and Properties **763**
Fluorescent Heterocycles **167**
2-Fluoroalkylthiophenes Synthesis **420**
Formation Azecines by Ring Destruction **733**
Azonia Compounds **712**
Azonines by Ring Destruction **733**
Benzofuro[3,3a-*d*]isoxazoles from 4-Phenylisoxazoline-1-oxides **736**
(±)-Corydalisol from Protopine *N*-Oxide **771**
1,4-Dihydro-3(2*H*)-isoquinolones by Photolysis **397**
4',7'-Dihydro-8'-phenylspiro[3*H*-indole-3,6'-(pyrazolo(3,2-*d*)-1,3,5-thiazepine)]-2,3'(1*H*)-dione **526**
7-Hydroxycephalosporin **414**
Hypecorine from Protopine *N*-Oxide **771**
2-Isothiazolines by Photochemistry **622**
Isoxazolines from Dehydro-*D-erythro*-ascorbic Acid **786**
2-Oxo-1',2',4',5'-tetrahydrospiro[3*H*-indole-3,3'-1,2,4,5-tetrazine]-6'-thione **525**
2*H*-Pyrans from Alkylthiodiphenylcyclopropenium Ions **496**
Pyrazolo(1,5-*a*)pyridines from Pyrido(1,2,*b*)-4,12-thiadiazine **663**
Pyridoisoquinoline **746**
Pyrroles **627**
1,2,4-Thiazoles by Photochemistry **622**
Thiazoles from Dehydro-*D-erythro*-ascorbic Acid **786**
Thietanes by Photochemistry **622**
1,3,5-Triazine-2,4-diones **687**
1,2,3-Triazolines **624**
3-Formyl-2(1*H*)pyridones Condensation with Thiones **533**
Friedel-Crafts Reaction 2-Chlorothiophenes **596**
Frontalin Synthetic Approach **603**

Fructofuranosyl Nucleoside Synthesis **543**
Fumaritrine Synthesis *via* 8,14-Cycloberbine **772**
Fumarofine Synthesis *via* 8,14-Cycloberbine **772**
Furanoeremophilanes Synthetic Approach **765**
Furanones Synthesis **598**
Synthesis by Cycloaddition **750**
3(2*H*)-Furanone Synthesis **604**
2(5*H*)-Furanones Synthesis **600**
3(2*H*)-Furanones Synthesis **600**
Furans Synthesis by Cycloaddition **750**
New Synthesis from DMAD **449**
Furocoumarin Acylation **642**
Furopyridines Electrophilic Reaction **738**

G

Gephyrotoxin Synthesis **399**
Gilvocarcin A Structure **797**
Glucopyranosylthioureas Synthesis from Rhodanines **792**
***D*-Glucosamine** Synthesis of Thienamycin **417**
***D*-Glucose (−)-Sarracenin** Synthesis **550**
***D*-Glyceraldehyde Acetonide** Synthesis of β-Lactams **428**
(+)-Griseoviridin Synthetic Approach **731**
Guanosine Mitsunobu Reaction **545**
2-(C^8-Guanyl)amino-1-methyldipyrido[1,2-*a*:3',2'-*d*]imidazole Structure **437**
Guest Inclusion Geometry Paracyclophanes **388**

H

2-Halopyridines Photolysis **648**
Hansch Design Topliss Manual Approach **577**
Harappamine Structure Detemrination **489**
(±)-Heliotridane Synthesis **402**
***N*-Heterocycles** Alkylation **360**
Heterocyclic Synthesis *Via* Metalated Amides **357**
Heterocyclisation Amidines **757**
4a,5,6,7,8,8a-Hexahydro-9*H*-imidazo[1,2-*a*]indole Synthesis **373**
Himalayamine Structure Determination **691**
Homoadamantano[4,5]-fused Azaheterocycles Synthesis **683**
Homolytic Property Porphinato-irons **749**
Homophthalic Anhydrides Cycloaddition to Quinones **724**
2-Homothienamycin Synthesis from 6-Aminopenicillanic Acid **431**
Homothiopyrylium Ions Synthesis and Properties **469**

Host-Guest Complex Formation Paracyclophanes **389**
Host Compounds Cyclodextrins **390**
Hydration 7,8-Dihydro[3*H*]pterin **756**
Hydrolysis 3-β-*D*-Ribofuranosylwye **748**
Pyrylium Cation **590**
12-Hydroxyabietan-8,11,13-triene-19-oate Reaction **605**
5-Hydroxybarbituric Acid Oxidation of Barbituric Acids **653**
7-Hydroxycephalosporin C Formation **414**
6-Hydroxy-4-(2'-di-*n*-propylaminoethyl)indole Synthesis **521**
(±)-3-Hydroxyhomoaporphines Synthesis **698, 699**
Hydroxylation Benzeneselenic Anhydride **765**
Pyridinecarboxamides **532**
Yohimbine Alkaloids **556**
***Trans*-4-Hydroxy-*L*-proline** Synthesis of Pyrrolo(1,4)benzodiazepines **434**
3-Hydroxyquinoline-2,4-diones Formation from 4-Hydroxy-2-quinolones **653**
4-Hydroxy-2-quinolones Oxidation to 3-Hydroxyquinoline-2,4-diones **653**
5-Hydroxy-1,2,3-triazoles Synthesis **625**
Hypecorine Formaton from Protopine *N*-Oxide **771**
Hypochrotism Dimerization of Porphyrin **571**

I

***L*-Idopyranose** Synthesis **506**
Imidazoles Ring Transformation to Pyrimidines **491**
β-(1-Imidazolyl)enones Reactivity **364**
Imidazo[1,2-*c*]thiazoles Synthesis and Cycloaddition **573**
Imino-1,3-diselenols Synthesis **472**
Imino-1,3-dithiols Synthesis **472**
2-Imino-1,3-oxazines Synthesis **677**
Imino-1,3-thiaselenols Synthesis **472**
2-Imino-1,3-thiazines Synthesis **677**
Indole Alkaloids Synthetic Appraoch **325**
Indolenines Formation from 1-Acylindolenines **409**
Indoles Catalytic Transfer Hydrogenation **722**
Methoxylation **721**
Reaction with Phenylpropiolate **524**
Vinylation with Olefins **572**
Indolizines Reaction with Diazonio Ions or Cripto-ions **720**
Intramolecular Aminopalladation 1-Aminohexatriene **486**
Intramolecular Aza-Wittig Reaction Generation of Bridgehead Imines **576**
Intramolecular Ring Transformation Synthesis of Bridgehead Nitrogen Heterocycles **373**
Ipso-Substitution Pyridine Ring **385**

Isocardenolide 774
Isoindolo[2,1-*b*]isoquinolinium Salts Synthesis and Properties 484
Iso-lasalocid A Synthetic Approach 601
Isomerization 4-Oxo-4*H*-benzisoxazolo[2,3-*a*]pyridines 739
***cis-trans* Isomerization** 5-Ethyl-2-oxo-4-piperidineacetic Acids 647
Isopaulownin Systhesis 549
1(2*H*)-Isoquinoline Carboxylic Acids Curtius Rearrangement 569
3-(1-Isoquinolinemethylene)-$\triangle^2$-1,2,4-oxadiazolin-5-ones Synthesis and Reaction 703
Isoquinoline *N*-Oxide Reaction with Active Methylenes 664
Isoquinolines Synthesis from 1,3-Benzothiazine-β-lactams 461
Isoquinolones Synthesis from *N*-Phenylacetyliminium Ions 700, 701
(−)-Isoretronecanol Total Synthesis 610
Isoselenazoles Reactivity 612
Isothiazoles Synthesis 623
2-Isothiazolines Formation by Photochemistry 622
Isoxazole Annelation with Diironnonacarbonyl 615
Isoxazoles Synthesis *via* Lithiation 457
Isoxazolidines Synthesis by Cycloaddition 710
Isoxazolines Formation from Dehydro-*D*-erythro-ascorbic Acid 786

J

Japp-Klingemann Reaction Novel Heterocycles Synthesis 570
Jolkinolide A Total Synthesis 764
Jolkinolide B Total Synthesis 764
Jolkinolide E Total Synthesis 764

K

Limogine Structure Determination **691**
Linaloyl Oxide Synthetic Approach **603**
Lithiation Synthesis of 5-Alkoxymethyl-and 5-Alkylthiomethylisoxazoles **457**
2-Lithio-2-trimethylsilyl-1,3-oxathiane Acyl Dianion Equivalent **361**
Lorostemin Synthesis **396**
Lumiflavin Flavin Catalyst **391**
Lycopodium Alkaloids Synthetic Appraoch **325**
γ-Lycorane Synthesis *via* Aziridine **770**
Lyngbyatoxins Synthetic Approach **408**

M

Macrocycles Synthesis **386, 387**
Synthesis *via* Ipso-Substitution **385**
Macrocyclic Lactams Synthesis **279**
Macrocyclic Lactones Synthesis
Macrocyclic Polyethers Synthesis by Intramolecular Photocycloaddition **718**
Malonylheterocycles Synthesis and Properties **357**
***D*-Mannitol** Synthesis of Natural Products **370**
Mass Spectrometry Quinolinium Nucleosides **795**
4(R)-MCTT Chiral Induction **454**
Mechanism Photoisomerization of 4-Oxo-4*H*-benzoisoxazolo[2,3-*a*]pyridines **739**
Medermycin Structure Determination **416**
Medium-sized Nitrogen Heterocycles Photochemical Formation **529**
Mesionic Heterocycles Synthesis, Structure and Reaction **513**
N^{in}-Mesitylene-2-sulfonyltryptophan Synthesis **508**
***meso*-1,1-Bi(2-methylpiperidine)s** Barriers to Rotation and Inversion **585**
Metalated Amides Heterocyclic Synthesis **357**
Metal Porphyrin Complexes Novel Functions **331**
Methallochlorins Asymmetric Charge Distribution **382**
1,6-Methano-[10]-annulenes Synthesis **393**
Methano-oxonin Synthetic Approach **466**
Methanothiecinone Synthesis **466**
Methine Dyes Synthesis from 1-Alkyl-3-[4(dialkylamino)phenyl]-2,3-dihydro-2,2-dimethyl-1*H*-indole-3-carboxaldehydes **719**
7α-Methoxycephalosporins Synthesis from 7β-Aminocephalosporins **425**

10-(5)-Methoxydaunorubicin Conformation **21**
Methoxylation Cephalosporin C **414**
Indoles **721**
Methoxypyridoazepines Formation from Azidomethoxyquinolines **485**
3-Methyl[15]annulenone-Hydroxy-3-methyl[15]annulenylium Ion Cycle **380**
***N*-Methyl-9-(dicarboalkylmethyl)acridanes** Chemiluminescence **584**
6,2'-Methylene-cycloceridines Synthesis **539**
Methyl Migration 4,5-Dimethylcarbazole Synthesis **723**
***N*-Methylphthalimides** Photo-dearomatization **693**
2-Methyl-4*H*, 5*H*-pyrano[3,2-*c*](1)benzopyran-4-one Synthesis **686**
Methylsulfinylmethylthiamine Reaction **628**
Microbial Secondary Metabolites 352
Micro-Computer-Assisted Synthetic Design 785
Mitomycin Synthetic Approach **410, 594**
Mitsunobu Reaction Deoxyguanosine **545**
Guanosine **545**
Modified Polonovski Reaction 351
Moenjodaramine Structure Determination **489**
Monobactams Biological Activity **191**
Morphan Ring Synthesis from Norborradiene **656**
Mutagenicity Azulenoquinolines **439**
Diazulenopyridines **439**

N

NADPH Model 1-Benzyl-1,4-dihydronicotinamide **391**
Naphthofurans Synthesis and Biological Activity **631**
Naphthyridinomycin Synthetic Approach **398**
Neosurugatoxin Synthetic Approach **730**
New Hb Model Picket-gable Porphyrin **383**
Nitidine Total Synthesis **711**
6-(2-Nitroethyl)-3-alkyl-2H-1,3-benzoxazine-2,4-dione Synthesis **531**
4-Nitroindoles Synthesis **523**
NMR Study 1,4-Dihydronicotinamides **796**
Quinolinium Nucleosides **795**
Rubranine **758**
Non-classical β-Lactams Total Synthesis **29**
8-Norketoyobyrine Synthesis **405**
(+)-Nuciferal Synthesis from *D*-Mannitol **370**
(+)-Nuciferol Synthesis from *D*-Mannitol **370**
Nucleophilic Acylation Heteroaromatics with Aromatic Aldehydes **362**
Nucleoside-Amino Acids Adducts 509

(±)-Nuphar Indolizidine Synthesis **402**

O

Octahydroimidazo[1,2-*b*]cinnoline Synthesis **373**
Octahydroquinolines Synthesis by 1,3-Dipolar Cycloaddition **566**
Oligoribonucleotide One-pot Synthesis from Nucleoside **546**
One-pot Synthesis Benzothiazolones from 2-Halonitrobenzenes **455**
Benzoxazines **709**
Oligoribonucleotide from Nucleoside **546**
Pyrrolo[2,3-*d*]pyrimidin-4-imines **741**
Quinazolines **709**
S-Substituted Pyrimido[4,5-*b*]quinolines **708**
Optical Properties Polythiophenes, Polypyrroles and Polyfurans **394**
(±)-Otonecine Synthesis **401**
1,2-Oxathietanes Synthesis and Reaction **365**
6*H*-1,3-Oxazin-6-ones Synthesis by Retrodiene Reaction **575**
1,3-Oxazin-6-thiones Rearrangement to Thiazines **367**
Oxazoles Diels-Alder Reaction **617**
1,3-Oxazolium-4-olate Synthesis and Reaction **452**
Oxidation 4-Acetyl-2-methylthio-$\triangle^2$-1,2,3-thiadiazoles **625**
4-Acyl-3-arylsydnones **628**
Barbituric Acid to 5-Hydroxybarbituric Acids **653**
Diazoalkenes to Epoxyketones **619**
From Amines to Nitrones by Tungstate Catalyzed Reaction **483**
4-Hydroxy-2-quinolones to 3-Hydroxyquinoline-2,4-diones **653**
Pyrroles **606**
Synthesis of Amido-lactones **689**
Thiopteridines **586**
Oxidative Degradation Dibenzo[*b*,*f*]oxepin-11(10*H*)-one **634**
Rearrangement Tetrahydroisoquinolines **478**
Oxadiazole Nucleosides Synthesis **441**
4-Oxo-4*H*-benzisoxazolo[2,3-*a*]pyridines Isomerization **739**
8-Oxoprotoberberine Synthesis **405**
2-Oxo-1',2',4',5'-tetrahydrospiro[3*H*-indole-3,3'-1,2,4,5-tetrazine]-6'-thione Formation **525**
3-Oxo-2*H*,3*H*-1,2,4-thiadiazoles Synthesis **498**
Oxygenated 5-Deazaflavins Reactivity **714**
Oxygen-Reduction Catalysts Porphyrins **249**
Oxygen-transfer Reaction Diazoalkenes to Epoxyketones **619**
Oxy-Vinyl(1,3)shift Carbon Enlargement **702**

P

Palladium Catalyzed Carbonylation Synthesis of 1,4-Benzodiazepine **411**
Palladium Catalyzed Polyhetero-Claisen Rearrangement 3-Allylthio-1,2,4-triazin-5(2*H*)-ones **515**
Palladium Catalyzed Reaction Pyrazines **672**
Palladium-Phosphine Complex Catalyzed Cross-Coupling Synthesis of Polyheteroarenes **643**
Papilacine Structure Determination **489**
Papilamine Structure Determiation **489**
[5]Para-1-azacyclophanes Synthesis **657**
Parabactin Synthetic Approach **41**
Paracyclophanes Guest Inclusion Geometry **388**
Host-Guest Complex Formation **389**
Paulownin Synthesis **549**
Penem, SCH 29482 Synthesis **421**
Penems Synthesis *via* Carbene Reaction **423**
Penicillin Conversion to Cephalosporin **424**
Penicillins Synthesis of Thienamycin and Carpetimycin A Analog **432**
Peptide Synthesis N^{in}-Mesitylene-2-sulfonyltryptophan **508**
Perfluoroalkylporphyrins Electron-deficient Porphyrins **384**
Perhydronicotoxins Synthesis **354**
2-Phenyl-4*H*-benzo[*b*]thiopyran-4-ones Synthesis and Antibacterial Activity **778**
4-Phenylisoxazoline-1-oxides Synthesis of 3*H*-indoles **736**
Phenyltrifluoromethylacetylenes 1,3-Dipolar Reaction **492**
Phospholenes Synthesis **609**
Phospholes Synthesis **609**
Phosphonates Asymmetric Synthesis from *L*-Prolinate **608**
Photoaddition 2-Pyridones to Dienes **645**
Photo-Arylation 2-Halopyridines **648**
Photochemical Addition 2-Quinolones to Alkenes or Alkynes **405**
Photochemical Cycloaddition Benzopyrones with Acetylene **685**
Photochemical Formation Medium-sized Nitrogen Heterocycles **529**
Photochemical Reaction *N*-Alkyl-7-azabenzonorbornadienes **692**
Photochemical Rearrangement 2,5-Diphenyl-1,4-dithiines **366**
Photochemical Ring Opening Pyrimidin-2(1*H*)-ones **660**
Photochemical Ring Transformation 4-Pyrimidinones to 5-Carboxypyrimidinium Betains **670**
Photochemistry 1-Azatriptycene **582**
Keto-Imine Compounds **725**
2-Pyridones **645**
Photocyclization Enamides **480**
Photocycloaddition Synthesis of Macrocyclic Polyethers **718**
Photo-dearomatization *N*-Methylphthalimides **693**

Photo-induced Alkoxylation Pyridinecarboxamides **532**
Photo-induced Alkylation Pyridinecarboxamides **532**
Photoinduced Asymmetric (2+2)Cycloaddition 4-Trityloxymethyl-2-buten-2-olide **374**
Photo-induced Hydroxylation Pyridinecarboxamides **532**
Photoisomerization 1-Acylindoles to Indolenines **409**
4-Oxo-4*H*-benzisoxazolo[2,3-*a*]pyridines **739**
Photolysis *N*-Acylbenzylamines **397**
2-Halopyridines **648**
β-(*o*-Heteroatom-substituted phenyl)vinyl Bromides **635**
Thioamides and Thioimides **622**
Photo-Ring Expansion Azidomethoxyquinolines to Methoxypyridoazepines **485**
Phthalaz-1,4-diones Synthesis **440**
Phthalazones Reaction **587**
Phthalimide *C*-Nucleoside Synthesis **787**
Picket-gable Porphyrin Synthesis **383**
Piperidines Oxidation to Piperidones **652**
Piperidones Synthesis from Piperidines **652**
Plaustrine Structure Synthesis **403**
Polonovski Reaction **351**
Polyfurans Properties **394**
Polypyrroles Properties **394**
Polythiaethers Transannular Interaction **462**
Polythiophenes Properties **394**
(+)-Polyzonimine Total Synthesis **551**
Porphinato Irons Synthesis and Homolytic Property **749**
Porphyrin Hypochroism in Dimerization **571**
Porphyrin-Iron Complex Cytochrome P-450 Model **784**
Preparation Allylic Monophosphates **476**
3-Benzoyl-3,4-dihydro-4-quinazolonecarbonitrile **512**
***L*-Prolinate** Asymmetric Synthesis of Phosphonates **608**
Properties Bridged Thionin **465**
β-Carboline-3-carboxamides **527**
Crown Ethers **376**
2'-Deoxypurinenucleotides **75**
5-Halo-5,11-dihydrodibenzo[*b*,*e*]thiepins **471**
Homothiopyrylium Ions **469**
Isoindolo[2,1-*b*] isoquinolinium Salts **484**
Malonylheterocycles **358**
1-Methyl-2-azathiabenzene 1-Oxide **468**
Polycyclic Aromatic Thiophenes **356**
Property 3-*N*-Acyluridines **541**

Chromenes **564**
Cyclic Peptides **694**
Fluorescent Cyclic Polyether Dye **763**
4-Quinolones **564**
Protecting Group in DNA and RNA Synthesis 2-Nitrophenylsulfenyl Function **542**
9-Fluorenylmethoxycarbonyl Function **542**
Proton Transfer Reaction Cyclic Amidines **559**
Protopine *N*-Oxide Conversion to Benzophenanthridine and Secoberbines **771**
Pseudo-Gomberg Reaction 4-Aminopyridine *N*-Oxide **537**
Psicofuranosyl Nucleoside Synthesis **543**
Pteridines Anticancer Activity **137**
Pterins Reaction **359**
Purine 8-*N*-Cyclonucleosides Synthesis **788**
Purines Anticancer Activity **137**
Purinophanes Synthesis and Structure **574**
Purple Pigment From *Brevibacterium fluvum* **470**
Pyran Annelation **638**
2*H*-Pyran Formation **496**
Pyranoisoflavones Synthesis **553**
Pyranoxanthones Synthesis **396**
Pyrazines Palladium Catalyzed Reaction **672**
Pyrazinethiols Acyl Carrier **671**
Pyrazinoisoquinolines Synthesis **661**
Pyrazinols Acyl Carrier **671**
Pyrazoles Synthesis **459, 621**
Synthesis from Trimethylsilyldiazomethane **620**
$\triangle^2$-Pyrazolines Anionic Reaction **716**
Pyrazolo[1,2-*a*]indazolium Bromides Synthesis and Reaction **717**
Pyrazolones Formation from 1,3-Thiazinones **676**
Pyrazolo[1,5-*a*]pyridines Abnormal Formation from Pyrido[1,2-*b*]-4,1,2-thiadiazine **663**
Pyrazolo[3,4-*d*]pyrimidine Synthesis **516**
Pyrazolo[3,4-*d*]pyrimidin-4-ones Synthesis **433**
Pyrazolo[3,4-*b*]quinolin-4-ones Synthesis **433**
Pyrenophorin Synthesis **639**
Pyridazino[4,5-*e*][1,3,4]thiadiazines Synthesis and Desulfurization **715**
Pyridinecarboxamides Alkylation, Hydroxylation and Alkoxylation **532**
Pyridine β-Ketoalkylation with Silyl Enol Ethers **536**
Pyridines Ipso-Substitution **385**
Synthesis **641**
Synthesis of 1,4-Diheteroepines **681**
2(1*H*)-Pyridinethiones Synthesis from Pyrylium Salts **632**

Pyridoisoquinoline Formation **746**
Pyridones Reaction with Isocyanates **687**
Synthesis **459, 641**
2-Pyridones Photoaddition to Dienes **645**
Pyrido[4,3-*d*]pyrimidine-8-carbonitriles Synthesis **518**
Pyrido[2,3-*d*]pyrimidines Synthesis **289**
Pyrido[2,1-*b*]quinazolin-11-ones Synthesis and Stereochemistry **678**
Pyrido[1,2-*b*]-4,1,2-thiadiazine Formation of Pyrazolo[1,2-*a*]pyridines **663**
2-(2-Pyridylaminomethylene)succinates Ring Closure **740**
***N*-(2-Pyridyl)formimidates** Reaction with Haloketenes **528**
Pyridylglycols Synthesis **535**
Pyrimidines Anticancer Activity **137**
Formation from 1,3-Dialkyluracils **289**
Reaction **560**
Ring Transformation of Imidazoles **491**
Synthesis **659**
Synthesis from Amidines **558, 668**
4(3*H*)-Pyrimidines Synthesis from Amidines **757**
Pyrimidinones Formation from 1,3-Thiazinones **676**
4-Pyrimidinones Photochemical Ring Transformation to 5-Carboxypyrimidinium Betains **670**
Pyrimidin-2(1*H*)-ones Photochemical Ring Opening **660**
Pyrimidin-4-ones Synthesis from Diphenylcyclopropenones **666**
Pyrimido[4,5-*b*]quinolines One-pot Synthesis **708**
Pyrimido[4,5-*e*]-as-triazine Synthesis **519**
2-Pyrones Synthesis **636**
Pyrroles Oxidation **606**
Pyrrolidines Formation *via* 1,3-Dipolar Cycloaddition **607**
Synthesis **435**
Pyrrolo[1,4]benzodiazepines Synthesis **434**
3*H*-Pyrrolo[1,2-*a*]indol-5,8-diones Synthesis **410**
Pyrrolo[2,3-*d*]pyrimidines Synthesis and Reaction **363**
Pyrrolo[2,3-*d*]pyrimidin-4-imines One-pot Synthesis **741**
Pyrroloquinoline Quinone Novel Function **392**
Pyrylium Cation Synthesis and Hydrolysis **590**
Pyrylium Salts Synthesis of 2(1*H*)-Pyridinethiones **632**

Q

Quebracamine Total Synthesis **409**
Quinazoline-2-thione-4-one Reaction **587**
Quinazolines One-pot Synthesis **709**
Synthesis **503, 511**

Quinazolone Reissert Compound Synthesis and Reaction **512**
***o*-Quinol Acetate** Synthesis of Tetrahydroisoquinoline Dimers **697**
Quinolines Synthesis **565**
Synthesis Using Ruthenium Complex Catalyst **567**
Quinolinium Nucleosides Synthesis and Spectroscopy **795**
4-Quinolones Synthesis and Property **564**
***o*-Quinone Methide *N*-Substituted Imines** Diels-Alder Reaction **399**
Quinones Ring-Closure Reaction with Diamines **707**
Quinoxalines Formation *via* Ring Transformation **704**
2(1*H*)-Quinoxalinones Synthesis **673**

R

Radiation-induced Pyridinecarboxamides **532**
Radiation-induced Alkoxylation Pyridinecarboxamides **532**
Radiation-induced Hydroxylation Pyridinecarboxamides **532**
Radical Reaction Synthesis of Natural Products **1**
Reaction *N*-Alkyl-7-azabenzonorbornadienes **692**
5-Aminoisoxazoles **618**
1-(2'-Aminophenyl)-4,4-dimethyl-1,4-dihydro-3(2*H*)-isoquinolone **746**
2-Aminopyrido[1,2-*a*:3',2'-*d*]imidazole with DNA **437, 438**
3-Amino-1,2,4-triazines with Diketene **744**
5-Amino-1,2,4-triazoles with Cyclic β-Keto Esters **742**
2-Arylideneaminopyridines with Haloketenes **528**
4-Azahomoadamant-3(4)-ene **576**
4-Aza-4-homobrend-3(4)-enes **576**

N-(2-Pyridyl)formimidates with Haloketenes **528**
Pyrrolo[2,3-*d*]pyrimidines **363**
Quinazoline-2-thione-4-one **587**
Quinazolone Reissert Compound **512**
Saframine A with CAN **555**
Tetrazolines **587**
1,2,5-Thiadiazoles **614**
Thiopteridines **586**
1,2,3-Triazines **674**
1,2,3-Triazole-*N*-oxides with Acylating Agents and Nucleophiles **493**
Triazolines **587**
1,2,4-Triazolyl-imino-dithiocarbonates **581**
Trichloromethylpyrimidines with Triphenylphosphine **669**
Trichloromethyls-*as*-triazines with Triphenylphosphine **669**
Vinamidinium Salts of Furans **448**
Vinylogous Acyl Cyanides with Enamines **695**
Reactivity 5-(2,2-Difluorovinyl)uracils **667**
β-(1-Imidazolyl)enones **364**
Isoselenazoles **612**
Oxygenated 5-Deazaflavins **714**
Thiirene Sulfoxide **497**
Rearrangement Chrysomycin A **797**
Cycloalkanone Oxime *O*-Allyl Ether **644**
2,5-Diphenyl-1,4-dithines **366**
3-(1-Isoquinolinemethylene)-$\triangle^2$-1,2,4-oxadiazolin-5-ones **703**
1,2-Oxathietanes **365**

Tetrahydroisoquinolines **478**
Toromycin **797**
Reduction 4-Acyl-3-arylsydnones **629**
Azetidin-2-ones to Azetidines **595**
Sulfoxides and Sulfilimines to Sulfides **463**
Reductive Desulfurization Thiomacrocycles **386**
Reformatsky Reaction *N*-Aryl-2(1*H*)-pyrimidinones **538**
Reissert Compounds **477**
Reissert Reaction **512**
Reissert-type Reaction **487**
Retrodiene Reaction Synthesis of 6*H*-1,3-Oxazin-6-ones **575**
Rhodanines Synthesis of Glucopyranosylthioureas **792**
β-*D*-Ribofuranosyl-4,7-methanoindazoles Synthesis **713**
β-*D*-Ribofuranosylpyrazolo[1,5-*a*]azepines Synthesis **713**
1-β-*D*-Ribofuranosylpyrazolo[3,4-*d*]pyrimidines Synthesis **544**
3-β-*D*-Ribofuranosylwye Hydrolysis **748**
Ring Closure 2-(2-Pyridylaminomethylene)succinate **740**
Ring Closure Reaction Quinones with Diamines **707**
Ring Opening Pyrimidin-2(1*H*)-ones **660**
Ring Transformation 1-Aza-dibenzo[*c*, *f*]bicyclo[3,3,1]nona-3,6-dienes **482**
1,3-Benzothiazine-β-lactams to Isoquinolines **461**
1,3-Dialkyluracils into Pyrimidines **289**
Heterocyclic Sulfoxides **460**
Imidazoles to Pyrimidines **491**
4-Pyrimidinones to 5-Carboxypyrimidium Betains **670**
Spiro[quinoxaline-3,4'-butene] into Quinoxalines **704**
1,3-Thiazinones to Pyrazolones and Pyrimidinones **676**
(−)-Rosmarinecine Total Synthesis **610**
Rubranine NMR and X-Ray Studies **758**
Rutaecarpine Synthesis **404, 405**

S

Saframycin A Reaction with CAN **555**
Salinomycin Synthetic Approach **601**
(−)-Sarracenin Synthesis from *D*-Glucose **550**
(±)-Sarubicin A Total Synthesis **552**
Selenazole Nucleosides Synthesis **441**
(±)-Sesbamine Total Synthesis from Nicotinamide **768**
Sexipyridine Synthesis **381**
Showdomycin Analog Synthesis **787**
Solenopsin A Synthesis **769**

Spatol Synthetic Appraoch **374**
Sphingosine Synthesis **309**
Spirobenzyl-β-carboline Synthesis **725**
Spirobenzylisoquinolise Synthesis **725**
Spiro[quinoxaline-3,4'-butene] Ring Transformation into Quinoxalines **704**
Stereochemical Aldol Condensation **107**
Stereochemistry Pyrido[2,1-*b*]quinazolin-11-ones **678**
Steric Effect Ring Closure of 2-[2-Pyridylaminomethylene]succinates **740**
Strepeliopine Total Synthesis **409**
Structure Bis(Crown Ethers) **761**
C-Cyclopyrimidine Nucleoside from 2'-*C*-Nitromethyluridine **540**
Gilvocarcin A **794**
2-(C^8-Guanyl)amino-1-methyldipyrido[1,2-*a* : 3',2'-*d*]imidazole **437**

(+)- and (−)-Tryptoquivaline G and L Total Synthesis **406**
Tubercidin Analog Synthesis and Biological Activity **445**
Tubifolidine Total Synthesis **409**
Tubifoline Total Synthesis **409**
Tungstate Catalyzed Oxidation Amines to Nitrones **483**

Tunicaminyl Uracil Synthesis **507**
(±)-Turneforcidine Synthesis **401**

U

Undecaribonucleoside Decaphosphate Synthesis **547**
Uracils Synthesis **516**

V

Verdazyls Betaine System **589**
Vertaline Total Synthesis **710**
Vilsmeier-Haack Reaction Acetophenone Oximes **568**
Vinblastine-type Compound Synthesis **351**
Vincadifformine Total Synthesis **409**
Vincamine Synthesis **727**
Synthetic Approach **689**
Vincristine Interaction to Homopolyribonucleotides **443**
Vinimidinium Salt Reaction **448**
Vinylation Indole with Olefins **522**
Vinyl Carbanions Application to Heterocycles Synthesis **395**
Virginiamycin M_2 Synthetic Approach **41**

W

Withaferin A Synthesis **488**
Withaferin D Synthesis **488**

X

X-Ray Analysis Thiadiphosphirane **475**
X-Ray Study Cannabicitrin **758**

Y

Yohimbanes Synthesis **728**
Yohimbine Alkaloids Hydroxylation **556**
Yohimbones Synthesis **728**
